beachdyl.com/about  
dylan@beachdyl.com

I'm a passionate programmer and public safety advocate from Virginia currently based in Florida. I love everything related to technology, computer systems, emergency response, and traffic cones. I have always felt drawn to pursuing a career in public safety, as it has always been my interest.

## WHO I AM

I am a passionate, driven leader with years of experience in technology, data analysis and reporting, systems administration, people management, and project coordination. I am seeking a position to gain professional experience while I finalize my degree in Data Science at Florida Polytechnic University.

## WHERE I STUDIED

2019 - 2026

Bachelor of Science Degree in Data Science, concentration in Big Data Analytics  
Florida Polytechnic University - Lakeland, FL

I was involved in the school's newspaper, was a member of the campus events team, and led the largest club on campus as Vice President.

2015 - 2019

Secondary Diploma

Marjory Stoneman Douglas High School

I graduated with Academic Honors and a Community Service Recognition. I participated in four extra-curricular activities, in all of which I held a leadership- or officer-level position.

## WHAT I DO

I build robots!

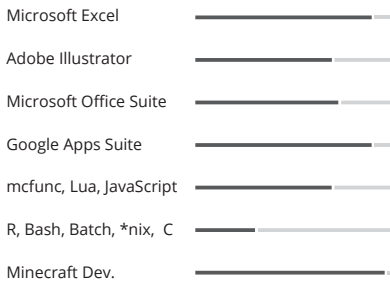

When it comes to technology, I think anything capable of logical processing is a robot in some capacity, from the computer to the toaster to Microsoft Word. I have years of experience building robots for fun, both digitally and in the real world, plus even more building robots competitively. I love to solve problems and robots are the best (or at least coolest!) way to do that.

I speak out!

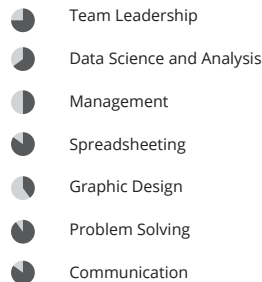

I have always been an outspoken advocate for equality, inclusion, diversity, and accessibility. Lapses in these fields are easily overlooked, if not given the attention they deserve. Going out of my way to ensure that people feel welcome and included in any environment, professional and personal, is a task that brings me incredible joy.

## WHAT I'M GOOD AT

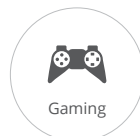

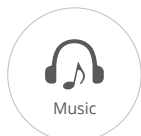

### SOFTWARE SKILLS

### PROFESSIONAL SKILLS

## WHAT I LIKE
